## Why choose an energy career?

- With the impending retirement of many baby boomers, as well as new innovations and system upgrades, the energy industry is growing and utility executives will be searching for qualified candidates to fill the gaps.
- The utility industry provides excellent compensation, benefits, and retirement packages, as well as job security—power lines will always remain local.
- Utility workers are committed to their jobs, believe in helping the customer, and have the opportunity to get involved in the latest evolving renewable energy sources.

## How can you get into energy?

Education is a great start! The Energy Providers Coalition for Education (EPCE)—providers of quality online, industry-sponsored education for the energy—has partnered with the Eastern Connecticut Workforce Investment Board, and Northeast Utilities to bring you an online **Eastern CT Energy Industry and Job Training Program**. All the courses are designed by the industry for the industry and offered through Bismarck State College's National Energy Center of Excellence.

Update your skills and knowledge with online energy career courses and complete a certificate in either of these two program options:

- \* Energy Industry Awareness
- \* Fundamentals of Energy

## Are you ready to get started?

A career in the energy industry does take commitment!  
For more information contact:

**Katrina Arnott, Green Jobs Funnel Coordinator**
